

VEGA SINDOÁ

Merlot

Type

Dry red

The vineyards

Nekeas has always trusted its Merlot. We know that the Nekeas Valley is this variety's natural home. Cool, north-facing soil gives small grapes with an unbeatable concentration of sugar balanced against good acidity.

The Valley's predominantly northern winds provide ventilation for the grapes, highly appreciated in this variety.

Some technical notes

Cold maceration before fermentation.

Gentle maceration. We do not wish to "force" exaggerated extraction from the grapes.

We let the skin gently surrender its mature, fruity compounds.

Temperature

Ideal serving temperature: between 12 and 15°C

Tasting notes

Pretty gentle purple colour. Notes of ground coffee, white chocolate, plums and sweet cherry. Medium body, good acidity and a final elegance in the mouth that is hard to find in wines as young as this.

Pairing

Rice dishes, charcoal-cooked meat and fatty fish. Soft cheeses.
